

<b>What</b>	Best Management Practices are things everyone can do in the kitchen to help protect the sewer collection system and private plumbing.
<b>Why</b>	If FOG is allowed to go down the drain, it can coat the inside of a pipe and over time that can lead to blockages. This prevents wastewater from flowing through the pipe and away from your home or business.

## What can be done?

---

Below are some suggested Best Management Practices that can easily be adopted in your kitchen to help protect the pipes.

- Scrape all food waste off dishes and into the garbage or compost

- "Dry wipe" all dishes before washing them and dispose of the paper towel used

- Pour all liquid grease into a metal waste container and allow to cool before disposal
